BRAND GUIDELINES · VERSION 1.0

Find them. Close them.

The rules for how BaseLead AI looks, sounds and shows up — from the BaseLead wordmark and Electric Blue to the app's icons, colors and how we write in English and Spanish.

PRODUCT	BY	LOCATION	CONTACT	UPDATED
BASELEAD AI	STUDIO BASE	AUSTIN, TX	INFO@STUDIOBASE.TECH	OCTOBER 2026

BaseLead

01 — Product

AI lead finding and sales, in one app.

BaseLead AI finds real businesses that fit your ideal client, scores them, writes the outreach, follows up on its own and tracks every deal to the signature. Built by Studio Base for sales teams, in English and Spanish.

FIND

Lead Discovery

AI search for real businesses, opportunity scores, decision makers and the Opportunity Radar map.

REACH

Outreach & Sequences

Personal emails from your own Gmail, automatic follow-ups that stop when the lead replies.

CLOSE

Pipeline & Proposals

Pipeline, proposals with e-signature and payment, the Sales Toolkit and team performance.

POSITIONING · DRAFT

Your next client is already out there. BaseLead finds them, writes to them and helps you close.

For small and growing businesses that sell B2B and want more meetings without more tools. **Mission:** give every sales team a base of real, ready-to-close leads.

PERSONALITY

WE ARE	WE ARE NOT
Smart	Robotic
Fast	Rushed or spammy
Helpful	Pushy
Premium	Flashy

Real data only

Real businesses and real results. We never invent leads, numbers or reviews.

Results first

Every screen answers: who should I contact next, and what do I say?

Respectful outreach

One-click unsubscribe, daily send limits and replies that stop follow-ups.

Bilingual by default

The whole app and its emails work in English and Spanish.

> BaseLead AI is a **Studio Base** product. It now shares the parent brand's **Electric Blue** as its main color; yellow becomes its secondary accent (the earlier yellow-first product color is retired).

02 — Voice

Clear, quick, results first.

Say what the user gets, then how. Labels are short verbs. Every public text ships in English and in neutral Latin American Spanish using "tú".

DO

- ✓ Lead with the result: "Find 50 dentists in Austin."
- ✓ Buttons are verbs: "Add leads", "Start sequence".
- ✓ Use real numbers: "3 replies this week".
- ✓ Tell people what to do next when something is empty.
- ✓ Talk to "you", speak as "we".

DON'T

- ✕ Lead with tech: "Leveraging LLM-powered enrichment..."
- ✕ Hype: "10x your revenue overnight".
- ✕ Fake urgency or fake social proof.
- ✕ Error messages without a fix.
- ✕ Say "the user" or "the client" in the app.

IN THE APP

Short labels and one-line hints. Never more than two sentences in a tooltip.

OUTREACH EMAILS

Personal and brief. One idea, one question, one link.

ADS & SOCIAL

One promise per post. Show the product, not stock photos.

NOTIFICATIONS · EN / ES

What happened + what to do: "Maria replied. Open the lead."

SAMPLE LINES

EN **Find the leads. Close the deals.**

ES **Encuentra los leads. Cierra los tratos.**

EN **Your next client is already out there.**

ES **Tu próximo cliente ya está ahí afuera.**

03 — Logo

The BaseLead wordmark.

"Base" in white or black, "Lead" and the four-point spark in Electric Blue. White "Base" on dark backgrounds, black on light. The yellow "Lead" version is retired.

PRIMARY · ON BLACK

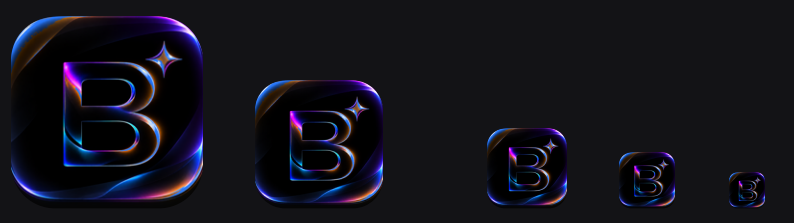

REVERSED · ON BLUE

ON WHITE

APP ICON

The glass "B" for stores and home screens.

A glossy "B" with the spark, lit in blue and purple on black. Used for the App Store, the phone home screen, the favicon and social avatars. It is an illustration, so it keeps its own colors.

1024 · App Store · 180 · Apple touch · 48 px · 32 px · 16 px

app.baselead.ai

B

CLEAR SPACE = HEIGHT OF THE "B"

1 × B

Clear space on every side of the wordmark

120 px

Minimum wordmark width on screen (30 mm print)

16 px

Smallest app icon size (favicon)

BaseLead

One word, capital B and L. In text: "BaseLead AI".

DON'T

Use the retired yellow "Lead" or recolor it.

Stretch or squash it.

Split "Base" and "Lead" or stack them.

Place it on busy images without a dark overlay.

Master files: wordmark on white and on black (2443 × 565 px PNG), wordmark for the app in light and dark mode, and the app icon set (16 – 1024 px). Vector SVG versions are still to be made.

04 — Color

Black is the base. Blue leads.

Electric Blue is the main color: buttons, links, the logo and most icons. Yellow is the secondary accent. Six more accents give each icon, tab and chart its own color — always one tone per color.

ICON TILES — ONE TONE PER COLOR

Every icon sits on a pastel tile of its own color (16% tint). Blue is used the most on every page; each other color appears about the same number of times. Hover glows use the color of the icon inside the card.

BALANCE

Mostly black, white and gray text, a clear amount of blue and small touches of the other colors. Red is only for warnings and deleting.

APPROVED PAIRINGS

PAIRING	USE	CONTRAST
White on Black	All text	20.4 : 1 · AAA
Gray on Black	Small text	6.1 : 1 · AA
Blue on Black	Links, labels	5.5 : 1 · AA
White on Blue	Buttons (14 px+ bold)	3.7 : 1 · AA large
Black on Yellow	Badges, highlights	12.5 : 1 · AAA
Ink on Light	Light mode text	15.5 : 1 · AAA

Light mode: page **#F5F5F7**, cards white, text **#1D1D1F**. Colored text uses a deeper shade of the same color (blue text becomes #2563EB) so it stays readable on white. No black lines or charts in light mode.

05 — Typography

Clean, sharp and readable.

One family does everything: Inter, the font the app is built with. Inter Display for big headlines, Inter for the interface and reading, and Inter in small caps-style labels for eyebrows and tags.

Aa.

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 0123456789 ñ á é í ó ú
¿? ¡!

DISPLAY

Inter Display

Headlines and big numbers. ExtraBold 800 and Bold 700, letter-spacing −2% to −4%.

INTERFACE & BODY

Inter

Buttons, tables, emails and paragraphs. Regular 400, Medium 500, Semibold 600. Line height 1.5–1.6.

LABEL

INTER SEMIBOLD

Eyebrows, KPI titles and tags. Uppercase, +12–16% tracking, often in blue. Post-it notes in the app use the handwritten Caveat.

Display Inter Display 800 · 72 px	Close more deals.
Page title Inter 700 · 28 px	Lead Discovery
Section Inter 600 · 18 px	Hot leads going cold
Body Inter 400 · 15 px	BaseLead finds real businesses that match your ideal client and writes the first email for you.
Caption Inter 400 · 12 px	Score 80+ · Austin, TX · 2 days ago
Eyebrow Inter 600 · 11 px	AI-POWERED INTELLIGENCE · INTELIGENCIA CON IA

06 — Interface & imagery

Dark canvas, lit in blue.

The app is premium and calm: black canvas, soft panels, one blue action per screen, and color that comes from icons and data — not decoration. Light mode follows the same rules on white.
